March 22, 2023

## Message From Ted

Last week marked the beginning of the National Citizens Inquiry in Truro, NS. As I listened to the testimony of Dr. Chris Milburn and Dr. Peter McCullough I was moved to tears. The information was not new to me, so why the tears? As I reflected upon the moment and the emotion welling inside of me, I concluded my response was one of relief. Finally, after three years of deception, distortion and outright lies, the truth was finally being told in a public forum on Canadian soil.

What we have witnessed and experienced since 2020 is beyond comprehension. Somehow, the fabric of our society evaporated almost instantaneously. The caring, compassion, and trust between family and friends dissolved. Our governments, medical, legal and media became unrecognizable. Who would have imagined that we could have plunged into such a dystopian world so fast? And yet, that is what happened.

Humanity is being tested. We are being asked to declare what we value; what we stand for; what we will allow and disallow. It would appear that nothing can be taken for granted anymore. And, maybe, that is the gift of this time. We can no longer live unconsciously and unintentionally. It feels as though every word we speak, every action we take is a declaration of who we are and what we value. What has been made clear to me is that truth, freedom, and integrity are the foundations of the life I aspire to live and leave for my children and grandchildren.

May humanity find its foundation and be stronger for it.

*Ted*

## The Real Risks of Childhood Vaccines

Over the last two years we have all watched in horror as the extent of the harm and damage that has been caused by the Covid injections has been revealed, with more and more irrefutable evidence of unnecessary death and disability coming to light on an almost daily basis.

If ever we needed proof of the danger of so-called 'vaccines' we now have it by the boatload.

**Vaccines Didn't Save  
Humanity**

Since 1900, there's been a 74% decline in mortality rates in developed countries, largely due to a marked decrease in deaths from infectious diseases. How much of this decline was due to vaccines? The history and data provide clear answers that matter greatly in today's vitriolic debate about vaccines.

## Survey Results From Last Week

**What is the most important lesson you learned over the past three years?**

## Other:

- I proved my mettle, to myself, in the face of bullies. "I was not born to be forced. I will breathe after my own fashion. Let us see who is strongest" – Thoreau
- The majority of doctors do not live up to their hippocratic oath, only \$
- Continue to listen to that guiding voice within; be proud of what you have learned; hold steadfast in faith; be brave and forge ahead, supporting one another!
- The big lesson for me was that we cannot trust any of the institutions we used to trust growing up: the medical profession, the police, the justice system, the financial system, the educational system, and on and on. None of these institutions defended the people. Instead they eagerly participated in the

destruction of our human rights. I can't see myself ever trusting again, especially considering that all of these institutions continue patting themselves on the back for their appalling behaviour, even today.
