

CHOICE INSIDER

August 30th, 2023

Message from Ted

Dear VCC Community,

The death of Sheila Lewis is a shock. But it shouldn't be. It was pre-meditated murder. Those complicit in her death include the doctors with Alberta Health Services transplant program, and every judge who failed to uphold inherent rights and medical ethics - Justice R.P. Belzil, the three judges on the Alberta Court of Appeal, and the nine judges sitting on the Supreme Court of Canada, which declined to hear her appeal. Each of these individuals and

institutions failed us by agreeing that the value of human life is conditional upon adopting a political ideology.

Ms. Lewis was not the only Canadian to die after being refused a life-saving surgery because of vaccination status. Garnet Harper, a 35-year old Ontario husband and father of five young children, died on May 22 after suffering from kidney failure. He too was denied a transplant for ideological reasons. To add insult to injury, while her husband was dying, an organ donation program called to ask for Mr. Harper's organs. It seems his organs only matter when he's dead.

How is it that we are hyper sensitive to discrimination when it may offend someone by not using the correct pronouns for their shifting gender identity, but completely disregard discrimination that results in the loss of livelihood or life? I'm not sure how to reconcile this egregious disregard for human life, liberty, and bodily sovereignty.

What is being revealed is that all the safeguards we thought were in place have tragically failed. All the more reason why those of us who operate from a moral basis need to speak out, stand tall and refuse to comply with the complete disregard of morality. Humanity is in crisis and it is apparent that positions of leadership do not guarantee wisdom or morality, and may even be an indication of who is compromised. Our wisdom and courage is needed more than ever.

Dr. Chris Shaw drafted a Freedom Pledge that I invite all of us to adopt. It reads:

Before my Creator, my family and my community, I declare:

- **I will rise up, speak up and disobey harmful and tyrannical orders, whether they come from a domestic or foreign entity.**
- **I will stand in my power and authority and reclaim my innate rights and what has been unlawfully and immorally taken from me, my**

family and my community.

- **I will resist any attempt, by government or otherwise, to divide people or communities from each other, or to subjugate any people to discrimination or harassment based on ethnicity, faith, bodily autonomy, or freedom of choice.**
- **If the enemies of freedom come for anyone's children, my neighbors, my community, or my nation, I will resist.**
- **I will not surrender my rights, nor those of my children and community.**

Rest in peace Sheila Lewis and Garnet Harper. We will not let your passing be in vain.

Ted

the
Choice**

Insider

The Harming of Our Children Needs to Stop.

It won't happen with government legislation or agency oversight, or media exposing the harms. Each of these safeguards have been captured. The harming will stop when more and more parents recognize the truth about vaccination and stop complying. This means we have to do a better job of educating our youth and young parents.

We now recognize that our contribution at Vaccine Choice Canada is to develop the resources and education campaigns that will give young parents a chance to make an informed decision. With this in mind, VCC is developing new resources and methods of getting the word out.

- We are developing a new education series entitled

Raising Nature's Child, a program to inform parents of the beauty and power of our innate immune system, and how to properly support it.

- We are launching **Fearless Vaccine Education** for those who want to do a deeper dive into the wealth of information available on vaccines.
- We are drafting a **New Parent Guide**, a resource to assist young parents to make an informed decision.
- And we need to shift our information dissemination strategy from articles and hour long interviews with world experts, to **30 second video clips** and an engaging social media campaign, the preferred method of receiving information of young people.

All of this takes time, resources and money. With this in mind, we are making changes to the frequency of the **Choice Insider** as one way of better allocating our resources. The result is that we will be publishing the Choice Insider every second week. I trust you recognize and appreciate the value of this shift and how we

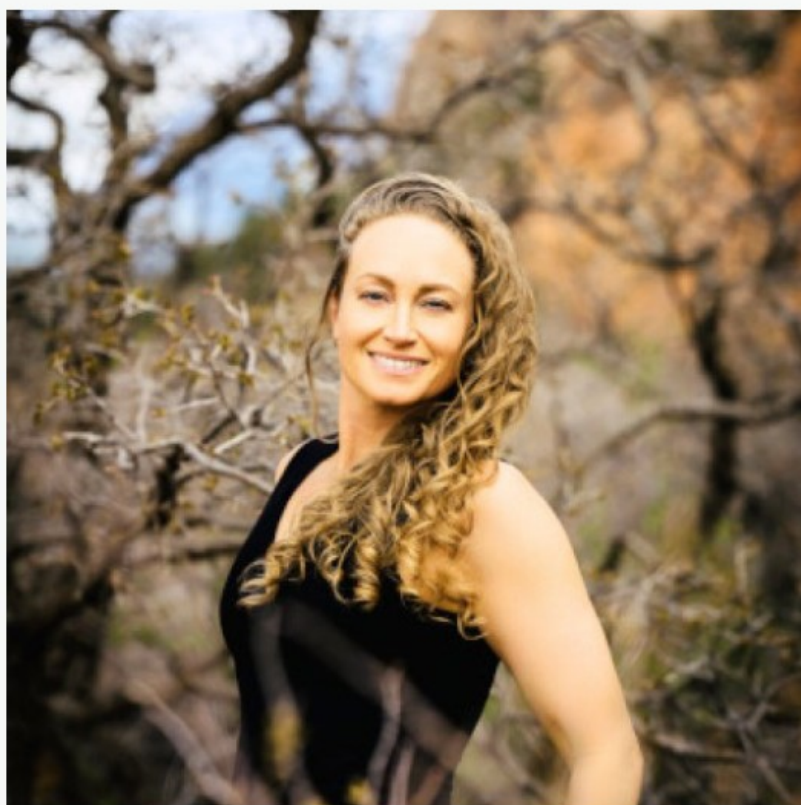

use our limited resources. Thank you for your continued support. We couldn't do what we do without your membership, donations and encouragement.

Sincerely,
Ted

Meredith Miller

Addressing Our Trauma With Meredith Miller

Meredith Miller is a holistic coach, author, and speaker who helps people self-heal after narcissistic abuse and other toxic relationships. Her mission is to bridge the gap between trauma and purpose. She teaches mindsets and tactical tools to help with recovery. In 2020, Meredith began speaking out about the psychological abuse patterns - from the micro to the macro - that she was observing in the New Normal world. Her holistic perspective on the global events underway can help people understand the baffling behavior of others while offering inner solutions for addressing our collective and individual trauma.

Common Sense 2023

Common Sense was written by Thomas Paine in 1775–1776 and took the then unusual step of advocating for independence from Great Britain for the people in the thirteen British colonies. Writing in clear and persuasive prose aimed at ordinary people, Paine made an impassioned case for freedom by elaborating on the harms of maintaining a subservient relationship with Great Britain and the moral and political arguments for a new, egalitarian government of their own choosing.

Important Event

Presentation to Aurora Town Council by Joel and Margaret

**Hello Vaccine Choice Canada
Members, Subscribers
& Supporters, and Freedom
Lovers Everywhere,**

**On Tuesday September 19th at
7:00pm EDT, VCC Board members,
Margaret & Joel Sussmann will
make a Presentation, also know as
a Delegation, to Aurora Town
Council.** While the subject of 15
Minute Cities will be mentioned
during our presentation, the focus
will be on the bigger picture of the
Town of Aurora, and indeed the
whole of York Region, adopting
policies and measures, (known as
the "Strategic Plan"), laid down by
foreign entities and NGO's, (Non
Governmental Organizations). Some
prominent examples of NGO's are
The United Nations, The World

Health Organization and The World Economic Forum. In fact, the genesis of 15 Minute Cities are the Strategic Development Goals laid down by the United Nations.

This is being done in Aurora and many towns and municipalities in York Region, across Ontario and all of Canada. We will certainly make our Mayor and all Town Councilors in attendance aware that the citizens of Aurora have not been properly informed of these policies and measures and that they have not been given the opportunity to vote on them.

It is absolutely critical that we fill every seat in the public gallery at this Council Meeting. Only then will Council understand that we have serious and legitimate concerns that must be properly addressed.

PLEASE SAVE THIS MEETING INFORMATION:

Date: Tuesday, September 19th,
7:00 pm EDT

Location: Aurora Town Hall (Main Council Chambers)

- 100 John West Way, Aurora, ON,
L4G 6J1

- Your in person attendance is critical to the success of our Delegation!
- Please bring with you as many like minded friends who value their freedom as you possibly can!
- Please plan to arrive by 6:45 pm to ensure you get seats in the public gallery!

***We are all in this together - for
Canada, to preserve our way of
life and our God Given Freedoms!
Together - we can make a
difference!***

In Appreciation!!!

Joel & Margaret Sussmann

Website Review

Symptosi

Symptosi is the Greek word for coincidence.

Coincidence: A remarkable concurrence of events or circumstances without apparent or casual connection.

This website is a vehicle to allow people to share their experiences post inoculation. To bring greater awareness, to real concerns and to encourage others to come forward to tell their stories. By recognizing there is a problem we can work together to find solutions.

Quote of the Week

"And I asked him, when he spoke about, I would have to get it if I wanted to continue on with a transplant. And I said, *"how safe is this vaccine?"* And he looked at me, and he didn't even blink, he said, *"100 per cent safe."* And I said, *"there's no data. Hasn't even been out very long, there's nothing on it, we don't know anything about it. How could it be 100 per cent safe?"* He said, *"it's 100 per cent safe."* He said he bet his life on it, I said, *"okay."*

So, I went home, and I thought about it, I told him I'd get back to him. But when I did get back to him; I got searching in the meantime, online, there wasn't a whole lot out about it. And I just kept putting it off and putting it off. The more I put it off, the more I found out, the more I

didn't feel good about it, it was just a gut feeling. Just something, don't know, because I've never ever said no, I wanted this transplant so bad. I've never said no to them, it was a hard, hard decision. It was either, well, you either take it or you're going to die. That's basically what it come down to. And I knew it was no good. They didn't even do the testing on it; they stopped all testing. It's supposed to go through a series of tests and not only that, a vaccine takes years. To come up with a vaccine, a safe and effective vaccine. They certainly didn't take years unless it was done long before."

– Shelia Lewis transcript of NCI testimony, May 17, 2023
