

Dare to Question Vaccines

daretoquestionvaccination.com

Increase in Autism Prevalence 1970 to 2018

At this exponential rate it is predicted by 2025 that at least 50% of all children will be diagnosed with autism, even without the added burden of Covid shots.

Compare Canada's Vaccine Schedules

Birth to 18 Years Provincial/Territorial Averages

1950s	14 doses of 5 vaccines
1983	23 doses of 7 vaccines
2020	68 or 70 doses of 16 or 17 vaccines

Vaccines are the only product where a manufacturer is not legally liable for the injuries and deaths caused by their products. No one is held responsible.

No childhood vaccine product licensed for use in Canada has been tested using the long-term, double-blind, placebo-controlled studies required for all other pharmaceutical products.

ALL VACCINES CARRY SERIOUS RISK

The incidence of known vaccine injuries including anaphylactic food allergies, asthma, impaired physical / emotional / cognitive development, eczema, autism spectrum disorders, obesity, diabetes, and cancer have increased since 1980 in lockstep with the ever increasing vaccination schedule.

Children are the next group to be targeted with gene modifying Covid injections.

Statistically, children are at ZERO RISK of dying of COVID.

There is no medical or ethical justification to expose children to these injections.

COVID shots are causing unprecedented numbers of injuries and deaths worldwide.

Known risks of Covid shots include: brain swelling, paralysis, seizures, stroke, narcolepsy, shock, heart attack, autoimmune disease, arthritis, joint pain, blood clots, multisystem inflammatory syndrome in children, cancer, neurological injury and death.

Our children are injected with products where safety is determined by the numbers of injuries and deaths reported after vaccination.

Stand Up for the Parental Right to Make Personal Health Choices for Your Child. The Decision is Yours - Make it An Informed One.

Vaccination is not mandatory in Canada. Do not be coerced into harming your child. **Simply say No.**

See **If Not Vaccines, Then What?** (pg 105) in **Dare to Question** for practical suggestions on how protect infants and children so that they may achieve their birth right of strong immunity to the complications of illness and to reach their full developmental/cognitive potential in health and happiness.

These two ground breaking studies show that unvaccinated children are healthier than vaccinated children - bit.ly/HealthyKidsVCC

THE MOST IMPORTANT DECISION PARENTS WILL EVER MAKE.

Our Right • Our Choice • Our Future
