

Say NO to Vaccine Mandates/Coercion

Unlawful Public Health Actions

In Canada, children as young as nine years old are coerced and bullied into receiving vaccines without parental consent or knowledge.

The Mature Minor doctrine cannot override the wishes and consent of the parents outside of the emergency threat of imminent harm or death.

Vaccinations do not fall under the Mature Minor doctrine.

Vaccine compliance elicited under threat of coercion, bullying, or suspension of rights and freedoms, constitutes an extreme bullying and coercion and is construed under Canadian Medical Law as a battery.

**Say NO to public health preying upon our children.
Stand united in NON-COMPLIANCE NOW.**

The citizens of Canada are protected under the medical and legal ethic of expressed informed consent and are entitled to the full protections guaranteed under:
