Position Paper – Medical Coercion

Monday, July 19, 2021

The Birth of Medical Apartheid in Canada

Under the guise of ‘the greater good’ there is an effort to impose the injection of an experimental medical treatment of unknown safety and efficacy upon every individual on the planet. Those who exercise their inherent right to informed choice by not receiving the COVID vaccine have become the latest target of public enmity.

We are at a crucial time in the history of humanity. Never have bodily sovereignty, informed consent, freedom of choice, parental rights, and democracy been under such threat. Idealists and fundamentalists are contributing to the detriment of humanity in their misguided efforts to do good and protect one another.

COVID vaccination enforced by government mandate would be highly unpopular. Instead of mandates, businesses, universities, colleges, and service providers have been deputized to use coercive measures as a means to enforce government edicts. Employees are now being forced to choose between their sovereignty and their livelihood. Students are forced to choose between a public education with their peers or no education, based on their vaccination status. Even professional athletes are forced to choose between either getting the injection or acquiescing to a series of measures designed to coerce all but the most fervent to accept the shots.

We are witnessing the birth of a medical apartheid system in Canada, based solely on whether one has or has not participated in human trials for a genetic experiment.

Safety Concerns – No Medical Justification

It is an intentional misrepresentation to call COVID injections vaccines when in fact they are medical devices that inject never before used synthetic genetic modification technology. COVID genetic treatments have not been formally approved and have not been adequately tested for safety. The long-term consequences of injecting this technology into the human body are unknown. Individuals receiving COVID injections are participating in human experimentation.

The purported reasons to receive COVID injections are two-fold. One advantage being sold is the idea of reduced risk of infection or transmission. The other selling point is the promise of reduced severity of symptoms should one be diagnosed with the illness named COVID. Neither of these governmental/pharmaceutical sales pitches is supported by medical evidence. In fact, the manufacturers of the COVID genetic treatment openly admit that their products do not prevent infection, nor have they been proven to prevent transmission.

It is important to note that the survival rate of the illness in the unvaccinated is 99.85% for all ages, and that there are numerous reports of previously healthy individuals coming down with COVID following inoculation.

Those who are truly concerned about those most vulnerable to COVID illness want everyone vaccinated, including those not at risk, despite the risk and dire consequences associated with these experimental injections.

Researchers and physicians across the world are ringing the alarm bells warning that COVID shots may cause life-long injury and death, infertility, miscarriages, birth defects, and may alter human genetics.

VAERS data released July 16, 2021, by the CDC showed a total of 463,457 reports of adverse events from all age groups following COVID vaccines, including 10,991 deaths and 48,385 serious injuries between Dec. 14, 2020 and July 9, 2021. It is also acknowledged that less than 1% of vaccine adverse events are reported indicating that the true number of injuries and deaths may be 100X these numbers.

VACCINE CHOICE CANADA
FREEDOM RISING

"When health officials assume that nature is imperfect and dangerous, we end up with all kinds of inappropriate procedures—from pasteurization to routine antibiotics to vaccinations. Unfortunately, these are not minor mistakes, but strategies that have led us to the greatest health crisis in the history of the world, and one that has disproportionately impacted our children in tragic ways."

— Thomas Cowan, *Vaccines, Autoimmunity, and the Changing Nature of Childhood Illness*

The evidence is clear that COVID injections are the most dangerous “vaccines” ever produced. More deaths have occurred following the COVID shots than the total number of deaths from all vaccines combined over a 30-year period.

Violation of Rights and Freedoms

Those participating in discrimination, segregation, and other coercive measures that remove the right to voluntary informed consent are agents in undermining essential individual rights and freedoms. To coerce or compel the acceptance of a medical product that has not been proven safe is dangerous and immoral. It also is criminal.

Those imposing vaccination requirements by means of coercion are effectively practicing medicine without a license. More disconcerting is that they are complicit in coercing the rapidly growing number of vaccine risk aware citizens to violate their own right of informed consent by submitting to these inadequately tested and fast-tracked experimental shots. Those complicit in this violation of our most basic of human rights can be held accountable.

“Vaccine compliance elicited under threat of coercion, bullying, or suspension of rights and freedoms, constitutes an extreme bullying and coercion and is construed under Canadian Medical Law as a battery.” - Lawyer, Rocco Galati

Discrimination against individuals who choose not to participate in medical experimentation violates our Charter rights and freedoms and fundamental medical ethics. The intention of such discrimination is to

arbitrarily restrict the rights and freedoms and demonize non-complying individuals. Such discrimination has no place in a free society.

To deprive employees, students, and consumers of their right to medical choice is to deny their sovereignty over their own body. The protection of bodily sovereignty and informed consent is legally guaranteed under provincial legislation and in international covenants such as the Universal Declarations of Bioethics and Human Rights, and the Nuremberg Code.

The Universal Declaration of Bioethics and Human Rights describes consent as follows: *“Any preventive, diagnostic and therapeutic medical intervention is only to be carried out with the prior, free and informed consent of the person concerned, based on adequate information. The consent should, where appropriate, be expressed and may be withdrawn by the person concerned at any time and for any reason without disadvantage or prejudice.”*

The **Nuremberg Code**, developed in response to the medical abuses of the Nazi regime, describes informed voluntary consent as *“the person involved... should be able to exercise free power of choice, without the intervention of any element of force, fraud, deceit, duress, over-reaching, or other ulterior form of constraint or coercion.”*

Conclusion

Discrimination and segregation based upon one’s medical choice is an unconscionable violation of the rights and freedoms of every Canadian. Current restrictions based on COVID vaccination status being promoted by businesses, universities, colleges, organizations, and associations clearly are a mechanism of intimidation and coercion that will serve only to increase the profits of the pharmaceutical industry and its bedfellows.

There is no evidence base that shows that demanding COVID shot compliance protects human health. Worse, acceptance of an experimental medication via coercion puts health and liberty in jeopardy, and places vaccine compliance enforcers in a position of criminal liability.

There is absolutely no justification that could possibly legitimize this violation of our inherent rights and freedoms. Discrimination and segregation are unacceptable, no matter how they are marketed.

Sincerely,

Vaccine Choice Canada
