

RESOURCES

Many of these books can be ordered at our online Amazon bookstore: <http://astore.amazon.com/v0fef-20>

- ***Dissolving Illusions***
by Suzanne Humpries, MD, & Roman Bystryanyk
- ***Vaccine Safety Manual*** – outstanding!
by Neil Z Miller
- ***Vaccine Epidemic*** –outstanding!
edited by L Kuo Habakus and M Holland
- ***The Peanut Allergy Epidemic: What's Causing It*** by Heather Fraser.
- ***Vaccine Illusion***
by Tetyana Obukhanych, PhD Immunologist
- ***A Shot in The Dark*** by Harris L. Coulter, PhD and Barbara Loe Fisher.
- ***Vaccines, Autism & Chronic Inflammation: The New Epidemic*** by Barbara Loe Fisher.
- ***Raising a Vaccine Free Child***
by Wendy Lydall
- ***The Vaccination Dilemma*** with Philip Incao, MD, edited by Christine Murphy.
- ***What About Immunizations? Exposing the Vaccine Philosophy***
by Cynthia Cournoyer.
- ***Evidence of Harm*** by David Kirby.
- ***Every Second Child***
by Dr. Archie Kalokerinos, MD.
- ***A Compromised Generation: The Epidemic of Chronic Illness in America's Children***
by Beth Lambert
- ***Immunization - The Reality Behind The Myth***
by Walene James
- ***Vaccinations and Immunization: Dangers, Delusions and Alternatives,***
by Leon Chaitow, ND, DO, MRO.
- ***Vaccination, Social Violence, Criminality: The Medical Assault on The American Brain***
by Harris L. Coulter, PhD
- ***How To Raise a Healthy Child In Spite of Your Doctor*** by Dr. Robert Mendelsohn, MD
- ***What Every Parent Should Know About Childhood Immunization***
by Jamie Murphy.

- ***Jabs, Jenner and Juggernauts*** by Jenny Craig, RN, PhD. An essential history that dispels the myth that vaccination eradicated smallpox
- ***Universal Immunization—Medical Miracle or Masterful Mirage?***
by Raymond Obomsawin, PhD
On our website at <http://vaccinechoicecanada.com/doctors-speak/universal-immunization/>
- ***The Greater Good***, DVD
\$20, email us to order
- ***Report on the Canada Vigilance Database***
From 1992 to 2012 the Canadian government recorded 87,911 vaccine adverse reaction reports. On our website at <http://vaccinechoicecanada.com/in-the-news/report-on-the-canadian-vigilance-database/> Or order hard copy for \$10.
- ***New Parent Guide*** (32 page booklet) \$5 incl. postage. Email us to order hard copy or view on our website at <http://vaccinechoicecanada.com/about-vaccines/vaccination-the-basics/parents-guide-to-vaccination/>
- **Back issues of our Newsletter**, years 1994 to 2014, \$10 per year of newsletters, including postage (or on our website free to members).

SUPPORT OUR WORK

Become a member, receive vaccine news updates and our internationally acclaimed *Vaccine Choice Journal*, mailed twice a year. New members also receive a comprehensive information package of more than 100 pages.

Suggested membership donations:

Family/individual - \$35 Professional - \$75

As well, we invite you to subscribe at no cost on the main page of our website to our monthly **News Bulletin** that brings you news updates from around the world.

Your Child • Your Future • Your Choice

...about vaccines

Vaccines are complex biochemical substances that by definition are drugs. Once injected they can cross the blood-brain barrier and cannot be deactivated or removed.

Starting at 2 months, then 4 and 6 months, a baby can receive up to 8 vaccines at each doctor's visit.

At 12 months babies are injected with 4 live virus vaccines—measles, mumps, rubella and varicella (chicken pox)—and then again at 18 months along with other vaccines.

In the first 2 years of life, a baby in Canada can receive up to 39 doses of 14 vaccines

“Excessive vaccination can result in brain inflammation and brain swelling that can be prolonged, even lasting years, if not decades.”

—Dr. Russell Blaylock, MD, Neurosurgeon
Neurodevelopment & Autism Spectrum Disorders
at www.russellblaylockmd.com

...about too many vaccines

“There is a huge body of research that shows that if you overstimulate the immune system at the periphery, especially in the critical stage of early development, you are going to influence the brain in a negative way, and risk irreversible damage. This research is rarely discussed, because it really shows that there is reason to question the safety of the burden of vaccines given to infants. There is a significant connection between the immune system and the central nervous system. You cannot influence the immune system at the periphery without changing something in the brain. The backbone of this research was done 30 years ago.”

—Lucija Tomljenovic, PhD
Neuroscientist at University of British Columbia
Interview reprinted in *VCC News Bulletin*, March 2015

...about autoimmune diseases

Aluminum adjuvants commonly used in vaccines to stimulate the immune system can trigger Autoimmune/Inflammatory Syndrome Induced by Adjuvants (ASIA). Chronic fatigue syndrome, arthritis, lupus, diabetes mellitus, thrombocytopenia, vasculitis, Guillain-Barre syndrome and demyelinating disorders can occur following injection with aluminum containing vaccines. Almost all types of vaccines have been associated with ASIA. Aluminum’s neurotoxicity is well documented, affecting memory, cognition, psychomotor control, damages the blood brain barrier, activates brain inflammation, depresses mitochondrial function and shown to induce allergy.

—Celeste McGovern, “*Attacking Ourselves*”
Article in the *Vaccine Choice Journal*, Spring 2015
Also online at www.greenmedinfo.com

...about MMR

“In February 2006, Dr. Peter Fletcher... publicly acknowledged that he had seen a ‘steady accumulation of evidence’ from scientists worldwide that the MMR vaccine is causing brain damage in some children. Also, ‘the refusal by governments to evaluate the risks properly will make this one of the greatest scandals in medical history’.”

“...there has been a tenfold increase in autism and related forms of brain damage over the past 15 years, roughly coinciding with the MMR’s introduction, and an extremely worrying increase in childhood inflammatory bowel diseases and immune disorders such as diabetes, and no one in authority will even admit it’s happening, let alone try to investigate the causes.”

— Dr. Peter Fletcher MD,
Former Chief Scientific Office, UK Dept of Health and former
Medical Assessor to the Committee on Safety of Medicines
(as quoted in the *Vaccine Safety Manual* 2008, pg. 238)

...about vaccine research

The science is not settled. There are no studies that have evaluated and compared the long term health outcome of fully vaccinated people with those who have never been vaccinated.

“The human immune system is one of the most complex systems in physiology. Despite a renewed interest in the immune system’s function in neonates and small children, much remains unknown concerning the immune effects of exposing infants and small children to such a barrage of vaccines early in life”.

—Dr. Russell Blaylock MD, Neurosurgeon
www.russellblaylockmd.com

...about vaccine research

MMR, hepatitis A and Varicella vaccines are produced from aborted fetal cell lines.

“Not only are the human fetal contaminated vaccines associated with autistic disorder throughout the world, but also with epidemic childhood leukemia and lymphomas” -

—Theresa Deisher Ph.D, genetic research scientist
In testimony to Minnesota Legislature, 2011
as covered in the *VCC News Bulletin*, September 2014

“To understand the safety of vaccines, you have to understand how a baby’s immune system works and what vaccines do biochemically in the body. That work has never been done.”

—Hilary Butler, medical journalist and researcher,
From her book *Just a Little Prick*, 2006

Vaccination is NOT mandatory in Canada Let’s keep it that way!

P.O. Box 169, Winlaw, BC V0G 2J0

Vaccine Choice Canada (VCC) is a federally registered, not-for-profit, educational society solely supported by donations from its members. VCC was founded by families whose loved ones have suffered severe vaccine reactions, including brain and immune system injuries, and death. Our mission is to empower individuals to make informed health care choices and to defend the medical ethic of informed consent.

We continue the work of VRAN (Vaccine Risk Awareness Network) and the Committee Against Compulsory Vaccination, which in 1984, won an exemption of “conscience” from vaccines required by Ontario’s *Immunization School Pupils Act*.
