

# Does the State Do More Harm than Good?

## Compare Canada's Vaccine Schedules

Birth to 18 Years Provincial/Territorial Averages

1950s 14 Doses of 5 Vaccines	1983 23 Doses of 7 Vaccines	2020 68 or 70 Doses of 16 or 17 Vaccines
4 DOSES of Diphtheria	5 DOSES of Diphtheria	1 DOSE of Meningococcal C-ACYW
4 DOSES of Tetanus	5 DOSES of Tetanus	2 DOSES of Meningococcal C-C
4 DOSES of Pertussis	5 DOSES of Pertussis	2 DOSES of HPV
1 DOSE of Polio (1957)	4 DOSES of Polio (Oral)	2 DOSES of Varicella (Chickenpox)
1 DOSE of Smallpox	2 DOSES of Rubella	2 DOSES of Rubella
	1 DOSE of Measles	2 DOSES of Mumps
	1 DOSE of Mumps	2 DOSES of Measles
		3 DOSES of Rotavirus
		3 DOSES of Hepatitis A (Aboriginal Only)
		3 DOSES of Hepatitis B
		3 DOSES of Pneumococcal C-13
		4 DOSES of Hib
		5 DOSES of Polio (IPV)
		6 DOSES of Pertussis
		6 DOSES of Tetanus
		6 DOSES of Diphtheria
		18 DOSES of Influenza

### Sub-standard Vaccine Safety Testing

No childhood vaccine product licensed for use in Canada or the USA has been tested using the long-term, double blind, placebo-controlled studies required for all other pharmaceutical products. The medical industry uses the monitoring of adverse events following vaccination as the primary method to evaluate safety. This means that our children are injected with products where safety is determined by the amount of injury or death reported after vaccination.

**If you are 35 years of age or older, you've received fewer vaccines in your life than a six-month old baby today.**

## No Liability for Vaccine Injury/Death

Vaccines are the only product where a manufacturer is not legally liable for the injuries and deaths caused by their products. The ultimate result of this legal immunity is that no one is held responsible for the injuries and deaths caused by vaccination.

## Do Vaccines Make Children Healthier?

For the first time in history . . . children are sicker than the generation before them. They're not just a little worse off, they are precipitously worse off physically, emotionally, educationally and developmentally."

~ Judy Converse, Pediatric Nutritionist, MPH, RD, LD

When will we finally conclude that these state imposed medical interventions do not work and that they in fact harm children?

**How much more harm can our precious children take?** This groundbreaking study shows unvaccinated children are healthier than vaccinated children - <http://bit.ly/UnVaxHealthier>

By design, vaccines force the immune system to respond with inflammation which then triggers the brain's own immune cells (microglia) to secrete highly toxic chemicals that lead to a chronically inflamed state in the brain, destruction of connective synapses, seizures, and brain injury.

## 2020: Add Compulsory Masking, Isolation, Distancing, Chemical Sanitizers

Denis Rancourt, PhD:

*"No randomized controlled trial study with verified outcome shows a benefit . . . to wearing a mask. There is no such study. There are no exceptions. No study exists that shows a benefit from a broad policy to wear masks in public."*

When children are deprived of social contact with other children, they suffer devastating consequences, both psychologically and physically.

## 2021: Add Experimental COVID-19 Shots

COVID shots cause life-long injury and death, infertility, miscarriages, and birth defects, may alter human genetics, have not undergone adequate and complete safety testing, and have not been proven to stop infection or transmission.

**COVID SURVIVAL RATE FOR ALL AGES is ~99.85%**  
Why the vaccine? See <https://bit.ly/CovFactsVCC>

## COVID Medical interventions, including vaccination, are VOLUNTARY in Canada

As Health Canada explained years ago: *"Unlike some countries, immunization is not mandatory in Canada; it cannot be made mandatory because of the Canadian Constitution . . . legislation and regulations must not be interpreted to imply compulsory immunization."*
