

Protect Your Child

The Mature Minor Doctrine

In Canada, children as young as nine years old have been coerced and bullied into receiving vaccines without parental consent or knowledge.

The Mature Minor doctrine cannot override the wishes and consent of the parents outside of the emergency threat of imminent harm or death.

Vaccinations do not fall under the Mature Minor doctrine

Vaccine compliance elicited under threat of coercion, bullying, or suspension of rights and freedoms, constitutes an extreme bullying and coercion and is construed under Canadian Medical Law as a battery.

The administration of a medical experimental treatment, without the informed consent of the parent/guardian, is a crime against humanity and is contrary to the Criminal Code of Canada, stemming from the Nuremberg Code and Helsinki Declaration of 1960.
