Dear Candidates for the leadership of the Progressive Conservative Party of Canada

First of all, thank you for your willingness to stand for consideration for leadership of the Progressive Conservative Party of Canada and your commitment to be of service to all Canadians.

I'm writing on behalf of the many Canadians who are members of **Vaccine Choice Canada**. It is our wish to select a leader who acknowledges and actively supports our values and is committed to preserving our Constitutional rights and freedoms.

I would appreciate if you would declare your position on the following so we can share this information with our members:

1. Will you defend the right of every Canadian to make up their own mind when it comes to the use of vaccine products?
2. Will you ensure that parents—not the government—make the vaccination decisions for their children?
3. Will you ensure that no child in Canada is deprived of the right to a public education and public daycare because of their medical choices?
4. Will you put an end to the use of the 'mature minor doctrine' to vaccinate minor children without the knowledge or consent of their parents, a practice that puts children at risk and violates the rights and responsibility of parents?
5. Will you support therapeutic choice and allow Canadians to decide how best to maintain good health and strong immunity?
6. Will you protect the right of Canadians to bodily sovereignty?

7. Will you ensure that should a vaccine for SARS-CoV-2 be developed, that it is the right of every Canadian to choose whether or not to partake, and that no coercive measures or restrictions will be imposed on those who chose not to partake in this medical product?
8. Will you ensure that all Canadians, including children, health care professionals, first responders, and military personnel, will be free from forced vaccination or coercive measures that effectively eliminate the right to informed consent?
9. Will you ensure that Canada joins all other G20 nations (excepting Russia) that recognize the ability of vaccine products to cause injury and death and enact a national vaccine injury compensation program where vaccine manufacturers, and not Canadian taxpayers, are held liable for vaccine injury and death?
10. Will you direct Health Canada to immediately conduct independent, inert placebo controlled, vaccinated vs. unvaccinated studies to determine the safety and efficacy of all vaccine products licensed for use in Canada?
11. Will you require that all Canadians partaking in vaccine products be provided with the manufacturer's product information monograph which documents vaccine ingredients, contraindications, known risks of injury and death, and limitations to safety testing?
12. Will you outlaw the censorship that occurs in mainstream and social media of those who acknowledge vaccine injury and who advocate for informed consent, safe vaccine products and practices, and responsible public health policies?

These are serious matters that concern and affect many Canadians.

Your clear and definitive statements on your position on these matters will assist our members in selecting the leadership candidate that best represents their values and supports the kind of society we wish to live in.

I look forward to your considered response.

Sincerely,

Ted Kuntz, President
Vaccine Choice Canada
