

POST CARD

Where is the evidence?

Provincial Health Officer, Dr. Bonnie Henry, has admitted, "I'm not a huge fan of the masking piece. There's not a lot of evidence to support mask use." Now, she's encouraging the public to wear masks for symbolic reasons.

Shouldn't evidence and science be the basis for our medical decisions?

Any imposed measures in response to COVID-19 need to be "minimal, necessary, finite, and demonstrably justifiable." Anything less in a free and democratic society is indefensible.

Please support the right to refuse unwanted and unnecessary masking.
