NEWS RELEASE

Vaccine Choice Canada (VCC), along with five individual mothers of children in the school system, have launched an action, in the Superior Court of Ontario, against the government of Ontario, challenging the Constitutional Validity of the *Immunization of School Pupils Act* and Ontario's compulsory vaccine regime, and the mandatory "education/information sessions", and sworn Statement required, to obtain an exemption from a vaccine, failing which a child will be suspended, expelled, and/or not registered.

The Plaintiffs state that this regime:

- Violates their right to freedom of conscience, belief, religion and thought under s.2(a) and (b) of the *Charter*.
- Violates the rights to life, liberty and security of the person in depriving them of the recognised constitutional right to make decisions over their physical and psychological integrity and autonomy under s.7 of the *Charter*.
- Violates the right against compelled speech, under s.2(b) of the *Charter* in being forced to sign, under oath, a Statement with which they disagree, and for which there is no conclusive proof, in being forced to acknowledge that to not vaccinate places their children at risk of physical injury or death.
- Violates their constitutional right to informed medical consent in that the "education sessions" mention nothing of the risk of severe injury and death, from vaccines, which is recognised and undisputed in all G-7 countries, except Canada, in the establishment of compensation funds for vaccine-injured and killed. Quebec is the only Canadian jurisdiction to have such a compensation fund.
- Violates and interferes with the parent-child relationship which is constitutionally protected under s.7 of the *Charter* as set out by the Supreme Court of Canada.
- Violates the child's right to Education which has been recognised as a constitutional right in Canada, under s.7 of the *Charter*, as well as in international law, which binds Canada.

The Plaintiffs state that the vaccine regime in Ontario is draconian, and violates a person's rights to informed medical consent and choice, over matters of if, when, and what vaccines a child is to receive. This decision is not the state's to make, on a blitz basis, but on a case-by-case basis with respect to the health, circumstances and propensities and predisposition of the child, by the parent with medical consultation. This is particularly so, when the inserts (warnings) of the vaccines, provided by the vaccine manufacturers themselves, specifically warn of dire and severe injury and side effects, up to and including death, which vaccine manufacturers' warnings the government, its health officials, and school officials, ignore, suppress, and deny without basis.

A protest and press conference are being held, at Queen's Park, Tuesday, October 29th, at 10:30 am, to remind the government to conduct itself in accordance with the dictates of the Constitution and not just be a peddler for the corporate interests of the \$60 billion vaccine industry, predicted to reach \$100 billion by 2020, without regard to the particular health and needs of the individual child.

Questions about the legal action or requests for a copy of the Statement of Claim may be directed at legal counsel on the action: Rocco Galati, Rocco Galati Law Firm Professional Corp, at 416-530-9684.
